DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Pluta et al.

Regarding claims 1, and 3, Pluta et al., discloses a force sensing device with features of the claimed invention including a first resistor, and an oscillating generating signals circuit which is received at one of the end of the resistor which is affected by an applied external force (see for example, claim 9).

Regarding claims 2, and 4, Pluta et al., teaches the use of a capacitor which is connected to the resistor as claimed (see, for example claim 9).

3. Claims 5-9 are allowed over the prior art of the record, due to the provision of various controls and interface.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
